**The data is sent on a CD-ROM, formatted as a tab-delimited text file. In many cases, the file is too large to save on a CD-ROM; therefore, our office uses WinZip to compress the files into one disk. Since voter registration data can be large and exceed record limitation of many applications, this office strongly suggests that you use a large database system to open and compile this information. In most cases, you will not be able to open this information with MS Excel or MS Access.*
