Permission is hereby granted by District for the construction and installation of the above described facilities in accordance with the following conditions:

1. The privilege hereby granted shall be at all times subject to the paramount right of District to the full and beneficial use and enjoyment by District of the irrigation facility for all purposes of District; and Permittee agrees, at its own expense, to make such changes in its installation as may be determined by District to be necessary to avoid interference with the convenient use and operation of said facility, easement and right-of-way.
2. Permittee agrees to contact District 48 hours prior to construction with all work and materials subject to inspection by District. Failure to notify District prior to commencement of work or inspection of work will constitute a basis for rejection of all work.
3. Permittee agrees that all work shall be completed, the area restored to its original condition, and all materials and debris removed from site on or before the completion date specified above. Permittee agrees to pay a late completion fee, as determined below, for every day after the completion date that Permittee's work prevents District's facility from being returned to scheduled service.
4. Permittee agrees that said work shall not interfere with the flow of water as required by District.
5. Permittee agrees that District shall not be responsible for any water that may flow in the facility at the time of construction.
6. Permittee agrees to compact all disturbed soil to a minimum 93% compaction (95% within City/County right-of-way), and agrees to make compaction tests available to District at Permittee's expense, if requested by District.
7. District may, at its option, require concrete or gunite lining of canal banks, and/or the bottom of any section of canal disturbed by Permittee which shall extend a minimum of six feet on both sides of the excavation and construction site.
8. Permittee agrees to keep and maintain the installation in good operating condition and repair for a period of one (1) year after the completion of construction and the acceptance of Permittee's work thereof by District, and to pay all costs of such repairs and maintenance and of any replacement of any part thereof required to maintain the installation in good operating condition.
9. The Owner/Agency that is proposing to cross FID's easement will be responsible for all local, state and federal permits.

**NOTICE TO CONTRACTORS:**

1. Fresno Irrigation District (District) is not a member of Underground Service Alert (USA). Calling District's Engineering Department at (559) 233-7161 can answer any questions concerning the location of District's facilities.
2. During Water Deliveries (i.e.: irrigation flows, storm flows, floodwater flows...etc.), District will not permit open trench excavation within District's easements.
3. Inspection fees are assessed as follows: Minimum of \$125.00 per week (2 ½ hours) or \$50.00 per day (1 hour). If additional inspection hours are necessary, the cost incurred will be withheld from the deposit or invoiced to the Permittee at \$50.00 per hour.
4. All work within District easements that WILL NOT impact Water Deliveries must be pre-approved by District and secured by a \$500 cash deposit. District will charge a Late Completion Fee of \$200 per week (or fraction thereof) that District's facilities are out of service after the completion date specified on this District permit. District will return deposit after completion of construction, or deduct costs from the deposit for unpaid fees.
5. All work within District easements that WILL impact Water Deliveries, or beginning 30 days prior to scheduled Water Delivery periods, must be pre-approved by District. Facility Shutdown fee of \$300 per day and a \$4,000 cash deposit must be secured with permit application. District will charge a Late Completion Fee of \$500 per day for each day (or fraction thereof) that District's facilities are out of service after the completion date specified on this District permit. District will return deposit after completion of construction, or deduct costs from the deposit for unpaid fees.

Permittee agrees to install at no cost to the District the structure designed, according to the plans and specifications approved by District. Permittee further agrees to indemnify the District and hold it, its officers and employees, free and harmless of, from, and against any loss, damage, attorney's fees, or other expenses caused by said work; and free and harmless of, from and against any loss, damage, costs, attorney's fees or expense incurred or suffered by said District because of the claims or any persons whatsoever, arising out of said construction and installation.
