Level of Care Information Age 0- 17:

TARGET POPULATION INFORMATION:

Target Population: TAY aged individuals (age 16-25) residing in Fresno County that are diagnosed with a severe mental illness or serious emotional disturbance.

CORE CONCEPTS:

- Community collaboration: individuals, families, agencies, and businesses work together to accomplish a shared vision.
- Cultural competence: adopting behaviors, attitudes and policies that enable providers to work effectively in cross-cultural situations.
- Individual/Family-Driven, Wellness/Recovery/Resiliency-Focused Services: adult clients and families of children and youth identify needs and preferences that result in the most effective services and supports.
- Access to underserved communities: Historically unserved and underserved communities are those groups that either have documented low levels of access and/or use of mental health services, face barriers to participation in the policy making process in public mental health, have low rates of insurance coverage for mental health care, and/or have been identified as priorities for mental health services.
- Integrated service experiences: services for clients/families are seamless. Clients/families do not have to negotiate w/ multiple agencies/funding sources to meet their needs

Please select core concepts embedded in services/ program:

(May select more than one)

Individual/Family-Driven, Wellness/Recovery/Resiliency-Focused Services

Community collaboration

Integrated service experiences

Cultural Competency

Please describe how the selected concept (s) embedded :

Each TAY participant is treated individually with a focus on person-centered goals and strengths. A treatment plan is developed in collaboration with the participant and includes personal goals in their voice. Participants are given the option to include support persons (family or others) in the development of the treatment plan. TAY staff promote the inclusion of support persons as part of the treatment team to enhance treatment interventions and outcomes. The treatment team attempts to offer a variety of options for treatment, rehabilitation, and support. Services are flexible and are provided with the individual needs of participants in mind. The program provides advocacy and helps develop connections with community partners. Collaborative relationships have been developed and maintained with several community agencies, treatment providers, and local government with the goal of continuity of care and optimal client outcomes. Program services focus on meeting the needs of the whole-person and ensure physical health, mental health, and substance abuse is considered in the treatment plan. Staff encourage and assist with linkage and transportation to primary care settings for preventative and follow-up health care. Program nursing staff provide routine monitoring of vitals, medication side effects, and health education. The TAY program is committed to hiring bicultural, bilingual, and culturally competent staff.

All staff members are provided sensitivity training in the area of cultural competence.

PROGRAM OUTCOME & GOALS

- Must include each of these areas/domains: (1) Effectiveness, (2) Efficiency, (3) Access, (4) Satisfaction & Feedback Of Persons Served & Stakeholder
- Include the following components for documenting each goal: (1) Indicator, (2) Who Applied, (3) Time of Measure, (4) Data Source, (5) Target Goal Expectancy
