(Page 1 of 20)

Innovation Work Plan Narrative

Date: 10-7-11

County: Fresno County

Work Plan #: INN-03

Work Plan Name: Holistic Cultural and Education Wellness Center

Purpose of Proposed Innovation Project (check all that apply)

- INCREASE ACCESS TO UNDERSERVED GROUPS
- INCREASE THE QUALITY OF SERVICES, INCLUDING BETTER OUTCOMES
- PROMOTE INTERAGENCY COLLABORATION
- INCREASE ACCESS TO SERVICES

Briefly explain the reason for selecting the above purpose(s).

All of the above stated purposes apply to this plan and will be addressed through the provision of the services. Increasing access to underserved groups and promoting interagency collaboration are two primary purposes, however all objectives will be tracked via outcome reporting. Stakeholders expressed a strong desire for serving the needs of Fresno County's diverse cultural and linguistic communities that are underserved or unserved. Stakeholders guided by past and current community planning processes reaffirmed the need to increase access to services for underserved Hispanic, African American, Native American, Southeast Asian, as well as other community groups in Fresno County that include but are not limited to the Veterans population, and individuals experiencing job losses, new moms, and other individuals that are facing depression, anxiety, and suicidal thoughts related to their unique needs and circumstances. Each of the underserved groups has their unique community, culturally, spiritually, and linguistically based wellness and recovery practices that they utilize for behavioral health related issues. Existing Fresno County CSS and PEI programs are required to deliver services in a culturally competent manner; however, we can be innovative and look at service delivery that is non-traditional but cultural and ethnic as a means to address disparities. Some of the existing disparities include; a lack of collaboration with cultural and ethnic groups, and understanding and respect of alternative and holistic approaches to positive mental health. Through Innovation we strive to test a new approach that may bridge some of the current gaps. Unique to this model is the co-location and inherent collaboration with the use of one facility to promote education and awareness of alternative/holistic opportunities and may also refer/link consumers to culturally appropriate services within the community. The goal is to increase access and collaboration by having the diverse cultural groups working together (cultural collaborations) to learn from each other and advance diverse and holistic approaches to wellness.

The EQRO FY 09-10 Report stated "The relative access and the average approved claims for Hispanic beneficiaries were lower than for White beneficiaries. Over the past

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 2 of 20)

four years of data, these disparities decreased slightly – approaching parity in approved claims but continued remarkable disparity in access." As it relates to cultural competency the EQRO report revealed the following disparities in services and penetration rates:

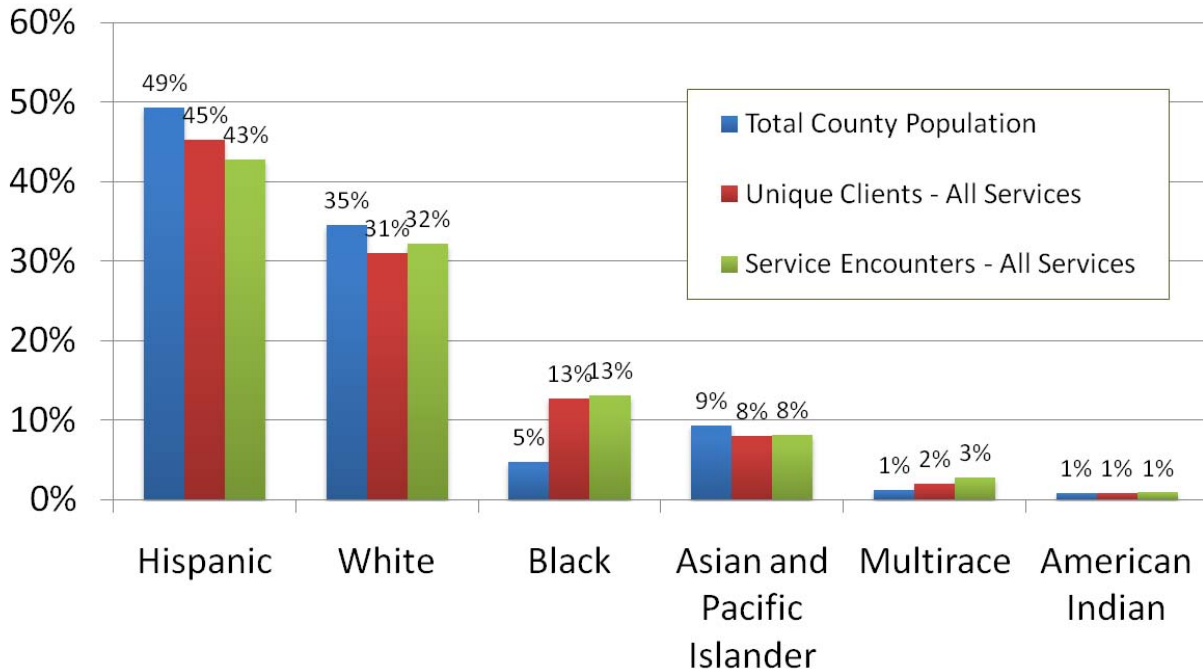

Component		Rating			
		Present	Partially Present	Not Present	Not Rated
6	Cultural competence principles and practices drive service delivery		X		

Element	Fresno	Rank	Large MHPs	Statewide
Penetration rate – Hispanic	2.83%	46	3.47%	3.41%
Approved claims per beneficiary served – Hispanic	\$2,588	42	\$3,745	\$4,448
Penetration rate – Asian/Pacific Islander	3.77%	N/A	4.42%	4.30%
Approved claims per beneficiary served – Asian/Pacific Islander	\$2,585	N/A	\$3,193	\$3,329

Based on RDA Consultant's system review of Fresno County Department of Behavioral Health, disparities in services were also indicated as shown in the chart below:

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 3 of 20)

The American Family Physician December 2005 Article on "Cross-Cultural Medicine" by Gregory Juckett T, M.D., M.P.H., *West Virginia University School of Medicine*, stated "A person's worldview (i.e., basic assumptions about reality) is closely linked with his or her cultural and religious background and has profound health care implications. Patients' worldviews and religious beliefs also affect how they view disease causation. Some see illness as having not only physical but also spiritual causes. Physicians should respectfully explore a patient's beliefs within the context of the patient's culture. Many patients use home remedies or visit traditional healers before seeking conventional medical treatment. Others return to traditional healers in lieu of completing an ongoing conventional medical work-up. Patients may lose confidence in their physicians if they do not receive prompt, culturally comprehensible diagnoses. Clinical success often depends on communicating with these healers and prioritizing tests and treatments".

In order to reduce some of the noted disparities in services to cultural and ethnic groups, and evidence revealed in literature reviews of culturally competent services, Fresno County is proposing a Holistic Cultural Education and Wellness Center as an innovative way to address wellness and recovery for the many diverse communities in our County.

During the stakeholder process, stakeholders identified a need for better quality of services and increased communication and collaboration between the Department and the community groups. RDA system review also identified a need for the Department to increase collaboration and communication with other agencies and with stakeholders in

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 4 of 20)

the community. This innovation strategy will be one of the links between the Department and underserved cultural groups in the community by providing an educational opportunity for awareness, access and linkages at a Holistic center that are based on the unique cultural, ethnic, spiritual, and linguistic needs of each underserved group. Education/awareness and linkages will be provided by staff, volunteers and community members that understand the unique needs of their communities and are well versed in the alternative opportunities to support wellness and recovery and understand the holistic approaches to wellness and recovery. This innovation strategy will also allow the Department to be more aware of what non-county operated programs and support systems are available to consumers leading to increase in the quality of services available for the underserved populations of our County. Reporting to the community on measurable outcomes on a regular basis will provide agencies, stakeholders, and consumers with quantitative data to determine the effectiveness of this proposed program.

Fresno County's innovation strategy will increase access to services, as consumers receive cultural and spiritual based consultation regarding mental health. Staff and community members will collaborate and educate each other regarding possible alternative/holistic services and how both Western/clinical practices and unique cultural and spiritual practices may be used to promote wellness and recovery.

Some of the current service gaps regarding culturally competent services in Fresno County are:

- A lack of collaboration with cultural and spiritual groups
- A lack of acceptance or understanding by those in the mental health profession in Fresno County of alternative/holistic behavioral health treatment that support the 'whole person'
- A lack of understanding and education of the variety of cultures and spiritual groups that are located in Fresno County and their perception of mental illness
- The well being of the entire person, aside from just mental health is not commonly/currently practiced

The gaps that exist in traditional Holistic Centers are:

- All cultures are not located in one center
- Not mental health/behavioral health focused
- Not focused on cultural issues manifested by the stigma associated with mental illness

Through this approach Fresno County's goal is to bridge the current gaps identified above in Fresno County cultural competence through a model that has been adapted to

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 5 of 20)

meet the needs of Fresno County through the Holistic Center model. The ultimate goal for Fresno County through this approach is to improve services through use of education and awareness. Fresno County's model embraces the diversity of the County and incorporates cultural practices into mental health. Many Holistic Models are focused more on physical health and don't incorporate cultural approaches to behavioral health wellness and recovery practices. In order to best serve the diverse community in Fresno County cultural approaches to mental health will be used.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 6 of 20)

Innovation Work Plan Narrative

Project Description

Describe the Innovation, the issue it addresses and the expected outcome, i.e. how the Innovation project may create positive change. Include a statement of how the Innovation project supports and is consistent with the General Standards identified in the MHSa and Title 9, CCR, section 3320. (suggested length - one page)

Vision Statement and Overarching Goals:

The vision statement and overarching goals of the Holistic Cultural Education and Wellness Center are stated below:

A culturally appropriate Holistic Center developed for the wellness and recovery of consumers based on alternative/holistic (cultural/spiritual) practices and opportunities that support the wellness of the 'whole person' while complimenting traditional treatment methods.

Overarching Principles

- Services shall be welcoming and focus on MHSa principles of wellness and recovery
- Services shall be an augmentation/compliment to the 'whole person' and not to replace current clinical practices/medications
- Services shall be voluntary
- Services shall be available to all individuals and groups
- An Advisory Committee/Council shall assist in the design and implementation of the Holistic Center under the guidance of the Department of Behavioral Health
- Understanding behavioral, physical, and spiritual health are all connected in the wellness and recovery of an individual

INN-03 – Holistic Cultural Education and Wellness Center will provide an innovative approach in addressing mental health/behavioral health related issues for underserved and un-served clients who may typically not seek traditional (Western clinically based) mental health services, and may be more responsive if County staff and County practices understand and incorporate alternative culturally and ethnically focused wellness and recovery practices. The Center is not designed to be exclusive in terms of who may access the education/referral component and any member of the community may be interested in alternative culturally and ethnically focused wellness and recovery practices in addition to clinically based treatment. The Holistic Center is not designed to replace current clinical practices/medications. The Holistic Center shall be welcoming and focus on MHSa principles of wellness and recovery, providing education, referral, linkage, to culturally appropriate alternative/holistic opportunities based around a holistic wellness and recovery approach that will be used to create positive change and meet the unique needs of individuals/community groups. It is not

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 7 of 20)

the design of the center to focus on religious practices. Religion and religious ceremonies will not be performed at the Holistic Center. Requests and referrals will be voluntary and will be open to all individuals and groups.

INN-03 will provide a new approach to a Holistic Center that will aid in the improvement of already existing and future culturally competent services in Fresno County and will assist in consumer's wellness and recovery based on a holistic model of recovery, which promotes understanding behavioral, physical and spiritual health as all are connected in the wellness and recovery of an individual. We imagine the diverse groups working together and learning from each other. This provides an opportunity for different cultures to come together with the same goal of serving the community and simultaneously learn about other cultural groups and about mental health. It is anticipated that positive, behavioral health, physical health, and spiritual health be strengthened. The Holistic Center may serve as a neutral place that acts as a link between clinically-based Western practices and Holistic approaches.

INN-03 will bring education/awareness regarding alternative/holistic options, and accessibility to targeted populations such as the Native American, Asian, African American, Hispanic, and other cultures (veterans population, individuals experiencing job losses, new moms, etc) that can use cultural brokers who focus on the whole person as opposed to just mental health. These holistic approaches may incorporate spiritual, cultural, and ethnic approaches to recovery and wellness. Education and awareness will also be inclusive of services seen as 'traditional mental health services' in an effort to show the potential collaboration between 'traditional' and 'non-traditional' services that benefit the consumer and family.

A Holistic Center Advisory Council (See Attachment A), made up of representative members of the community will be developed. The Advisory Council will provide recommendations on the design and development of the Holistic Center and the type of services to be offered as well as the general operation of the center under the guidance of DBH.

Native American, Southeast Asian/Asian, African American, Hispanic cultures, as well as other underserved groups that may include but are not limited to the Veterans population, and individuals experiencing job losses, new moms, and other individuals that are facing depression, anxiety, suicide thoughts, and other behavioral health issues related to their unique needs and circumstances would be linked to alternative forms of treatment that is based on each specific culture and focuses on the whole person as opposed to just mental health as a means to recovery and wellness. In accordance to Innovation Guidelines and Principals learning must be measured to determine clients reporting of wellness and recovery through education/awareness and possible linkages to alternative/holistic (cultural/spiritual) opportunities as a part of or independence of traditional Western services they are already engaged in (if applicable).

The Holistic center will be collaboration between stakeholders and the Department and shall promote Fresno County's Cultural Competency Plan guidelines as directed by Department of Mental Health. The Holistic Center and its activities will incorporate the cultural and spiritual identities of consumers as they strive for wellness and recovery.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 8 of 20)

The diversity of the services and activities at Holistic Centers will educate the general public thereby reducing the stigma associated with mental illness.

Cultural representatives, alternative/holistic healers and Cultural Brokers will receive training in identifying signs of mental illness that may affect members in their communities. The knowledge of mental illness and the services provided by the Department and other local providers will aid these (Cultural Brokers) in supporting consumers who belong to their communities.

Staffing:

Staffing shall consist of:

- Cultural Brokers who will represent the rich diversity of the Fresno County community. Job descriptions of the Cultural Broker are shown in Attachment B. There will be approximately 10 Cultural Brokers (approximately two staff from each targeted cultural/ethnic group).
- Cultural Brokers will demonstrate knowledge and expertise in holistic approaches to wellness and recovery based on community standards established/training received
- Cultural Brokers will receive training in identifying signs of mental illness that may affect members in their communities. The knowledge of mental illness and the services provided by the Department and other local providers will aid the Cultural Brokers in supporting consumers from their communities.
- Holistic Center staff will be inclusive of appropriate director/supervisory individual(s) that represent a strong behavioral health background. Additional staffing/consultation to include, but not be limited to physical health care, peer support, health educator, substance abuse and other subject matter experts. Staffing to be presented during any competitive bid process and be reviewed with standards set for in final approval INN 3 plan.
- Administrative staff designated to support all three Innovation Projects shall provide support to the Holistic Center as needed, which include: Utilization Review Specialist (Quality Improvement) and Provider Relations Specialist. All support staff (Behavioral health/primary care/administrative staff job descriptions are included in Attachment B). DBH staff time will also be budgeted for to ensure the strong collaboration and consumer wellness/safety for any consumer interested in any alternative/holistic opportunities. This will link the 'traditional' system of care with any cultural/ethnic options.
- Staffing may include Cultural Brokers and may be compensated for their consultation; however, will not be compensated for any holistic/alternative healing/practices.

Services

Specifically, the services provided will include, but not limited to the following:

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 9 of 20)

Educational Services

- Individuals/consumers will receive education (via on site Cultural Brokers) on culturally sensitive alternative practices that focuses on a holistic approach to wellness and recovery
- Education in alternative/holistic options will include such things as:
 - Benefits of spirituality in healing
 - Benefits of meditation
 - Benefits of positive, healthy, calming thoughts
 - Benefits of artwork, music, and dance
 - Benefits of culturally based story telling
 - Benefits of proper breathing techniques
 - Benefits of relaxing techniques suited for the individual client and their culture
 - Benefits of proper diet, exercise, positive mindset
 - Benefits of natural remedies to healing such as plant, herbal, organic alternatives (consultation with public health/clinical staff needed)
- Behavioral health/physical health services shall be offered in integration with other services offered at the Holistic Center
- Trainings will be offered on holistic approaches to wellness and recovery, this may include Webinars by recognized experts in the field
- Holistic approaches may include behavioral, physical, spiritual as well as other natural remedies for wellness and recovery
- Education and training on alternative/holistic practices for county/contracted staff shall also be provided

Referral and Linkage Services

- Referral and linkage services to culturally appropriate alternative resources /agencies within the community per DMH requirements
- As requested by the individual or as clinically indicated clinical/case management or peer staff may accompany a consumer to a Cultural Broker consultation that would assist the individual in their recovery
- Diverse Staff shall work together to learn from one another and augment services
- When appropriate, referral, and linkage to community Cultural Brokers will be documented in the client medical/clinical chart and follow up by clinical staff shall be standard procedure
- All Cultural Brokers and alternative healers (on the approved DBH list for potential links) shall be accredited/certified/licensed by their industry or community standards. For instance certification/licensing, etc is available for Chiropractor, Yoga, and Homeopathy. The Fresno County Cultural Competency Committee will maintain oversight of the Departments approved Cultural Brokers and alternative healer policy and procedure.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 10 of 20)

Referral Process Outside of the Holistic Center

Behavioral health staff not part of the Holistic Center that have undergone alternative healing training and in consultation with their clients may refer clients to the alternative holistic center/Cultural Brokers for additional education.

In relation to the MHSA and Title 9, CCR, section 3320, Fresno County's Innovation Plan meets all identified standards. A thorough Community Program Planning Process was done via the MHSA Innovation survey, focus groups, RDA consultant review, and stakeholder meetings. Service delivery and evaluation of this plan will include Community Collaboration and Cultural Competence. This plan will be both Client and Family Driven, and focus on Wellness, Recovery and Resiliency, and will contain Integrated Service Experiences for clients and their families. A detailed description of these key components is identified below:

1. Community Collaboration- The Holistic Center will promote a high degree of community collaboration in that cultural, ethnic and spiritual leaders from various underserved communities shall provide cultural based services to their communities and will receive training regarding mental illness from the Department and community providers.
2. Cultural Competence-The Holistic Center is designed to meet the standards of Cultural Competency, as cultural and spiritual leaders within Fresno County shall provide a holistic approach to the health and well being of consumers. In addition, the cultural brokers shall be trained in recognizing the early signs and manifestation of mental illness,
3. Client Driven- Clients who are from the identified populations may choose to seek non clinical mental health services via the Holistic Center based on their unique cultural, ethnic, and spiritual beliefs.
4. Family Driven- Family members of consumers will be very much a part of the recovery of the consumers in the identified populations. Families will have a strong influence and be a key in the support systems of consumers, and will be more involved due to the personal holistic nature of the treatment.
5. Wellness, Recovery, and Resilience Focused- The identified populations have not been appropriately served. The Holistic Center will highly promote the wellness and recovery of these individuals through non clinical and cultural based services.
6. Integrated Service Experiences- The Holistic Center will strive to provide "access to a full range of services provided by multiple agencies, programs and funding sources in a comprehensive and coordinated manner" (Title 9, CCR, Section 32000.190). The Advisory Counsel will collaborate with the Department and other providers/ organizations within Fresno County to best serve the clients in the identified populations.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 11 of 20)

Contribution to Learning

Describe how the Innovation project is expected to contribute to learning, including whether it introduces new mental health practices/approaches, changes existing ones, or introduces new applications or practices/approaches that have been successful in non-mental health contexts. (suggested length - one page)

Learning goal 1) Fresno County will achieve through this innovation program is to gain a better understanding of alternative/holistic treatment methods used and trusted by many un-served and underserved members of the community and to help identify the unique needs for each group. This learning will be collective for those seeking possible alternative/holistic options as well as educate those that are treatment providers, first responders and others regarding options and interest as brought up by the consumer/individual being seen. In the mental health field, there is a lack of understanding and use of non clinical alternative/holistic treatment methods that promote recovery, wellness, and wholeness. Fresno County's population differs from populations in other counties and therefore will add to the field of mental health by developing more culturally competent services for additional diverse groups. The whole area of cultural competence is new and needs further development.

Learning goal 2) will be to monitor and track the success of the alternative wellness and recovery practices and compare them to traditional clinical mental health evaluation levels. As cultural leaders express interest in this Innovation plan, Fresno County will be able to see the unique methods used in alternative wellness and recovery and apply some of these holistic cultural practices in their mental health practices.

In addition, with the collaboration of various cultural and ethnic groups the needs of un-served or underserved cultural groups may be re-evaluated and adjusted to be more culturally and ethnically sensitive.

Learning goal 3) in addition to Fresno County learning from this plan, various community groups will gain a better understanding of signs and symptoms of mental illness and help to assist in reducing the stigma of mental health in the community. The entire County stands to learn from the INN-03 program in that awareness and increased access to the Holistic Center will aid in stigma reduction.

The learning experience Fresno County will gain from the Holistic Center will be revolutionary in the approach in the treatment of mental illness. Holistic Centers are used all over the country in the treatment of mental illness, and successfully so. However the current models for Holistic Centers are not appropriate for Fresno County due to the unique needs of the diversity of Fresno County consumers. Other models don't have all cultures located in one center. The other models do not incorporate the Behavioral Health Departments with the Holistic Center as a collaborative partner to not only address mental health, but the overall health and wellness of consumers. Our plan has adapted this approach by proposing to collaborate with a large variety of diverse cultures and ethnic groups to reach the identified un-served and underserved populations. The adaptation of a Holistic Center also differs from other models in that an integrated approach to recovery and wellness will be used which incorporates unique cultural practices, traditional mental health training on signs of mental illness, and

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 12 of 20)

identifying evaluation measures that capture the success of the alternative/holistic treatment compared to traditional mental health clinical treatment by bringing different cultural groups together in one Center as opposed to separate centers for each group. Having different groups in one center will aid in learning from one another and promote collaboration of different healing practices. Fresno County stands to learn a great deal through this Innovation program and will learn how effective these type of culturally based services for the identified underserved populations will be. By Fresno County integrating traditional mental health treatment models with the Holistic model in our innovation strategy will provide Fresno County the opportunity to learn the benefits of providing both service types to our consumers.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 13 of 20)

Innovation Work Plan Narrative

Timeline

Outline the timeframe within which the Innovation project will operate, including communicating results and lessons learned. Explain how the proposed timeframe will allow sufficient time for learning and will provide the opportunity to assess the feasibility of replication. (Suggested length - one page)

Implementation/Completion Dates: 08/11-07/14
MM/YY – MM/YY

INN-03 The Holistic Center identified in this Innovation project is expected to start in November, 2011 and commence for a three year period through July, 2014. It is expected that this time frame will allow Fresno County Department of Behavioral Health sufficient time to assess the progress of this Innovation pilot project, make necessary adjustments as needed, as well as provide the opportunity to communicate results to the community, other key stakeholders as well as other County and State agencies.

Fresno County Department of Behavioral Health will report on a quarterly and monthly basis to key stakeholders via the Department's MHSA website, Mental Health Board meetings, as well as other community forums. The Department has established an Outcomes Committee and will report on a periodic basis key outcomes, success/lessons learned, learning achieved as well as opportunities for further learning associated with this program.

On a quarterly and monthly basis the Department will be able to track usage of the Holistic Center, and the amount of interest expressed by cultural and spiritual leaders, as well as the success of clients in their recovery and wellness. In addition, the Department will be able to track effective and integrated linkage methods, and be able to provide time sensitive follow-up as needed.

The three year period will allow the Department sufficient time to assess the feasibility of replication through concrete data collection methods, collaboration with key community partners on outcomes achieved, as well as through review and feedback from consumer/family members and consumer advocacy groups.

The three year time period allows for:

- Initial Design/training in this Innovation Program – November-December 2011
- Collaboration with cultural/ethnic community providers – November-December 2011
 - Inform the community of the Holistic Center plan and invite various cultural groups to become part of the Center
 - Develop and implement a Holistic Center Advisory Council
 - As each group commits to be involved they will submit their goals and hopes for the Holistic Center

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 14 of 20)

- Implementation of the program (including RFP, contracting, MOU's etc. as needed) November 2011 through project completion
- Monthly and Quarterly reporting to Mental Health Board and other stakeholders – December 2011- July 2014
 - At the end of each quarter the outcomes will be evaluated and potential and necessary changes will be identified
- Adjusting this Innovation model as needed to meet the needs of the consumers/family – Ongoing – November 2011 through July 2014
- Engaging clients to capture qualitative as well as quantitative data – November 2011 – July 2014.
- Defining the model in a final/completed manner that can be replicated to other agencies/communities - June 2014 - July 2014.

Innovation Work Plan Narrative

Project Measurement

Describe how the project will be reviewed and assessed and how the County will include the perspectives of stakeholders in the review and assessment.

The Holistic Culturally Cultural and Education Wellness Center innovation pilot project will be reviewed and assessed through a community stakeholder driven process. This process will include communicating openly on the projects goals and reporting to the community outcome measurements on a periodic basis. Specifically the project will be reviewed and assessed in the following methods:

- Measurable Outcomes for the Holistic Center will include but are not limited to:
 - Lowering recidivism levels related to higher levels of care. The primary objective would be to reduce the rates of incarcerations, hospitalizations, crisis services and suicide attempts for clients receiving services at the Holistic Center.
 - Reducing cultural and linguistic barriers between the various groups we serve and the behavioral health system leading to a more welcoming environment, reducing stigma, and increasing access to services.
 - Providing linkage to behavioral health programs/systems for those clients using the Holistic Center that typically would not go seek services from traditional mental health systems.
 - Promoting collaboration between various community agencies working together in a collaborative manner at the Holistic Center and benefiting from learning from one another. This interface will lead to a mutual respect of the various agencies/communities existing in the County.
 - Adopt a help first system versus a fail first system, i.e. prevention efforts will be used to reduce the likelihood of clients exhibiting higher levels of acuity.

Additional outcomes will be determined as this project is implemented

- Outcomes as stated in this Innovation Project (increase in culturally and ethnically sensitive services through having all the different cultures in the same Holistic Center) will be communicated to the Local Mental Health Board and at Mental Health Board (MHB) meetings. MHB meetings are attended by various community agencies, clients and families, advocacy groups, as well as other key stakeholders.
- Outcomes will be shared and discussed at other community stakeholder meetings such as the Adult Mental Health sub-committee, Children’s Mental Health sub-committee, as well as contracted provider organizational meetings.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 16 of 20)

- Outcome measurements will be posted on the Department's MHSA website and updated periodically – monthly and quarterly.
- Feedback from the community, clients and families will be received as services are being carried out and adjustments will be made to meet the needs of the community. Feedback will also help assess which elements of the proposed approach contribute to outcomes.
- Fresno County Department of Behavioral Health has created an Outcomes Committee and this committee will review and assess the performance of the project and provide suggestions for improvements as needed.
- Annual Updates to this project will be provided to the community and community forums/meetings will be set up to discuss outcomes and/or refinements needed.

What we will need to determine based on the outcomes, will be if this is a successful approach to a Holistic Center that meets the needs of Fresno County consumers. The outcomes that will be measured through the process listed above are the effectiveness of non clinical services in a Holistic Center that encompasses all of the identified cultures. In order to determine if this project is successful the success rate of consumers who are referred to the Holistic Center must be evaluated by effective follow up with consumers who are referred to the Holistic Center. Progress should be compared back to when consumers were seeking clinical approaches to address their mental health issues. Additional outcome measurement to include reporting of culturally/linguistically competent documentation in consumer records (of those engaged in 'traditional' care) due to the increased awareness and possible linkages based on consumer input. There should also be a comparison of other models versus our Holistic Center model.

Data will be received through internal Department databases tracking client progress/linkage, as well as through provider tracking systems such as client and family satisfaction surveys, focus groups, interviews, etc.

Innovation Work Plan Narrative

Leveraging Resources (if applicable)

Provide a list of resources expected to be leveraged, if applicable.

Leveraging resources is still being worked out and it is hoped that the Department can obtain leveraging resources through the following sources:

- Community Cultural/Ethnic/Spiritual Providers – office space, data sharing on outcomes and other statistical data, and consultation with facilitator/expert staff
- Natural Community Partners and referral sources – Community agency staff time, office space, and consultation time as well as data measurement sharing
- Other leveraging sources to be reviewed

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN
(Page 18 of 20)

Exhibit A

Holistic Center Advisory Council – DRAFT

Membership

An Advisory Council reflective of the culturally diverse Fresno County community shall provide recommendations on the design and implementation of the Holistic Center. Membership shall consist of, but not limited to the following:

- Consumers/Family Members (3)
- DBH staff (1)
- Public Health staff (1)
- Mental Health Board (1)
- Education Field (1)
- Spiritual/Faith Based Groups (3)
- Native American (1)
- Hispanic (1)
- Southeast Asian (1)
- African American (1)
- Other Underserved Groups (2)
- Consumer/family Advocacy Groups (2)
- Patient Rights Advocate (1)
- Legal Counsel (1)
- Cultural Competency Committee (1)

Membership Criteria

Membership on the Advisory Council will be based upon individuals having knowledge and experience regarding wellness and recovery principles, knowledge and experience on alternative healing and holistic practices, knowledge and experience working with various ethnic and cultural groups in the community/key leaders of the community, as well as recommended by the various agencies/designations referenced above. Additional education and training received by individuals shall also be considered in membership to the Advisory Council.

Membership Selection

Membership selection shall be based on resumes/letters of recommendations received from individuals willing to serve on the Advisory Council. Selected bidder shall receive all requests for membership and shall provide a response to interested parties. The Department of Behavioral Health may assist in this process as requested. All interested individuals shall demonstrate their commitment to culturally competent services in an integrated holistic manner.

By-Laws

Advisory Committee By-Laws shall be developed that shall further define the roles and responsibilities as well as operations of the Advisory Council and Holistic Center.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 19 of 20)

Exhibit B
Page 1 of 2

CULTURAL BROKER/WELLNESS EDUCATOR - JOB DESCRIPTION – DRAFT

DEFINITION:

Cultural Broker plans and directs activities related to Holistic Center culturally competent center (Holistic Center) as it relates to alternative healing education, referral, linkage, and related services as required. Cultural Brokers shall represent the rich diversity of the Fresno County community.

DISTINGUISHING CHARACTERISTICS:

The objective of The Holistic Center is the behavioral, physical, spiritual, and social well-being of County of Fresno residents. To accomplish this, the Holistic Center provides a comprehensive multidisciplinary system of wellness services. Support services include planning individual needs assessment, developing educational curriculum, media development, referral and linkage to appropriate community resources, health promotion, program development and implementation. Cultural Brokers must have strong: oral and written communication skills; strong organizational and time management skills, and be able to establish and maintain effective working relationships with consumers, community members, community organizations, various County departments/staff, and other related stakeholders.

In addition incumbents must remain knowledgeable with alternative healing/holistic methods and practices, new trends and issues in the health care field; and the integrated wellness philosophy of behavioral, physical, and spiritual health through readings, research, professional organizations, academic training, and participation in public health education. A high degree of initiative, maturity, integrity, good judgment, and the ability to work independently is required. Cultural Brokers shall receive training, and direction in the performance of assignments. In addition, Cultural Brokers shall receive training in identifying signs of mental illness that may affect members in their communities. The knowledge of mental illness and the services provided by the Department of Behavioral Health and other local providers will aid the Cultural Brokers in supporting consumers who belong to their communities.

TYPICAL TASKS:

1. Education to individuals/consumers on alternative healing practices existing in the community.
2. Referral and linkage to alternative healers based on wellness and recovery philosophy based on behavioral, physical, and spiritual health.
3. Establishes collaborative relationships and works with consumers, community groups, agencies and individuals on holistic wellness approaches and programs.
4. Advises Holistic Center Advisory Council on the most effective methods of developing and providing health promotion education, presentations and services.
5. Provides supportive services to adults and children. Supportive services through direct consumer contact. Education and referral to appropriate community alternative healing locations and other appropriate community and government agencies.

ATTACHMENT A – HOLISTIC WELLNESS CENTER WORKPLAN

(Page 20 of 20)

6. Demonstrates knowledge and expertise in holistic approaches to wellness and recovery based on community standards established/training received.

Exhibit B
Page 2 of 2

7. Develops and maintains communications with Holistic staff, interagency partners, community partners in order to provide support and assistance for health education and wellness promotion
8. Plans and assists with the development of in-service training programs for Fresno County staff and community organizations.
9. Prepares public information material regarding Holistic Center services, general wellness and recovery promotion information and educational materials.
10. Develops individual and community education, outreach, curriculum development and media development services to the community.
11. Provides presentations, training programs, reference materials, and conducts informational programs for the public and County/community agencies.
12. Prepares and maintains notes, reports, correspondence, special studies, and research on alternative healing practices and preventative health strategies.
13. Conducts surveys to assess feedback regarding consumer recovery and wellness, cultural competency, and consumer family partnership and participation.
