NARCOTIC TREATMENT PROGRAMS

OTP Level of Care 1 - Opioid (Narcotic) Treatment Program

These services are medically necessary and are provided in NTP licensed facilities in accordance with an individualized treatment plan determined by a licensed physician or licensed prescriber. Beneficiaries may be simultaneously participating in OTP services and other levels of care. OTP treatment components include intake, individual and group counseling, patient education, medication services, collateral services, crisis intervention services, treatment planning, medical psychotherapy and discharge services. An opioid maintenance criterion is a two-year history of addiction, two treatment failures, and one year of episodic or continued use, pursuant to 9 CCR §10270(d). OTP treatment involves the direct administration of medications on a routine basis as determined by the NTP prescribing physician. Beneficiaries will receive a minimum of 50 minutes of counseling with a therapist or counselor for up to 200 minutes per calendar month, although additional services may be provided based on medical necessity. Counseling and other services will be provided based on information gathered during the initial needs assessment. Treatment plans will be updated within regulatory timeframes or as new treatment issues present during the course of treatment. NTP programs will be required to offer and prescribe as needed, Methadone, Buprenorphine, Naloxone, and Disulfiram. In addition, proof of consumer understanding on choices of medications and treatment without medication will be documented in the patient chart.

RESIDENTIAL SERVICES

Level of Care 3.1, 3.3 and 3.5

Residential services are provided in a 24-hour, non-institutional, non-medical short-term residential program that provides rehabilitation services to youth, adult and perinatal beneficiaries with a substance use disorder diagnosis when determined by a Medical Director or LPHA as medically necessary. The length of stay for residential services may range from 1 to 90 days with a 90-day maximum for adults and 30-day maximum for adolescents. A one-time extension of up to 30 days is allowable if medical necessity is met based on reassessment.
