This course is designed to provide healthcare providers with a pre-hospital trauma care philosophy, stressing the need to treat the multi-system trauma patient as a unique entity with specific needs. This scenario-based course focuses on trauma patients in the prehospital environment, understanding the importance of a rapid assessment, rapid extrication, treatment of multi-system trauma patients. Upon completion of this course students will be able to recognize, identify and treat multi-system trauma patients, relate pathophysiology of injuries, and have a more comprehensive understanding of pre-hospital trauma interventions.
